What has the South lost by agitating the slavery question? In 1820, after a fierce agitation, slavery was prohibited by an aet of Congress in all our Territory North of 36 deg. 30 min., before Missouri could be admitted into the Union. After long agitation, this prohibition was repealed, and the Supreme Court has decided it unconstitutional. In 1849 and '50, the Abolitionists tried to prohibit slavery ir. all the Territory acquired from Mexico. After a fierce agitation, they failed to accomplish their object. The South stands to-day freed from any reproach in the action of the Federal Government. Her equality with the North is ac knowledged by Congressional action. The in stitutions of the South are better understood North now than at any time since the Abolitionists commenced their efforts, and are fes liable to be successfully assailed than at any previous period. The South has no desire to agitate the slavery question. She is anxious to he let alone in the enjoyment of equal right: with the North; but she will not decline a contest for these rights when they are assailed and she has lost nothing in any contest yet. She will be just as untiring in her resistance as her enemies in the assault. If new States now do not become slave States under the present poliey of the Federal Government, it is not the lault of the North. If she has more population and sends more people to our Territories, the South will not complaim. Fair play is all the South ever asked. She does not desire to di-North. Now, who is dissatisfied in the South The editor of the Journal and his party. They say the South is greatly injured. Well, why fair ought to be tried over again. don't they propose to rectify the wrong that has been done? They cry out that the South is in jured, and will not say a word to repair the injury When a violent fanaticism in the authorities of the North nulify the Fugitive Slave Law, and 10b individuals of the South of their rights, is she to keep silent? When the Abolitionists of the North say, "we are holier than you are and we must have all the Territories of the United States, and will take them by force,' are the Southern people to be silent ' When we are denounced as men-stealers and execrab! tyrants, and defied and spurned, are we to take it tamely; must we long for a coalition with our enemies, that we may sacrifice all our right h policy. Why should the South doeling nominious surrender? Is her cause a bad one that cannot be defended? Does she lack the are the people so ignorant or corrupt that they cussion to obtain her rights, does she lack the physical courage and power to defend them? Will any of the railers a aiust agitation tell us why the South should decline a discussion thrust upon her, unless he answers one of thes questions in the affirmative, and which one will

The truth is, the outery against agitation begging quarters from the Abolitionists. It is an admission that the South can't bear the agimust go to the wall, and begs for peace. Noth ing could please the Abolitionists better tha these symptoms from the South. They exult over them. The South quaits, they see, and begs for peace. Will a fierce and uncompro mising fanaticism, with a determined and hos tile purpose, be checked by such policy. Every one knows the contrary; and the untimely out cry for quarter comes from no friends of the South. It is a sinister movement, and looks to States. They don't intend to stop discussio They are fanatical and uncompromising. An ti-slavery is their life's blood in politics, and they demand nothing but a surrendr at discre tion. They intend to rule America, and wil not cease to try; and why should they when they see a party at the South advising a surrender; thereby admitting their forecast of de feat; proclaiming that they are nearly ruined already by the contest, and expect the worst in

We need not dwell on the absurdity of a part eroaking over an agitation, and proposing s lence upon a suliject that deeply concerns both ections of the Union; upon which the deepes feeling is enlisted; which the masses are think ing about, and talking about; which has been the great question of the Union; when the ri diculous protest against agitation is agitation and when the croakers can't keep off the subjeet; when they themselves fan the flame by railing at other people. It is a sublime specimen of folly, if there is any sincerity in it.

Opposed to the Agitation of the Slavery Question.

The editor of the organ is particularly anxous to stop the agitation of the slavery question prospect of a coalition in 1860 with Greeley, Giddings, Seward & Co. The way to stop the is not his role. His genius taks another direcagitation is to surrender all the rights of the tion altogether. Were Col. Jones and Colone South to the Abolitionists. During the agitaand declared he didn't carc how. The Democrats justly claim that their party is the only national party in existence. The Southern organs of Know-Nothingism, in defiince of truth, set up a similar claim. In Massachusetts, recently, they have nominated N. P. the mass of the party in Pennsylvania support the notorious David Wilmot for the same office, and in all the Northern States the affiliation with the Abolitionists is complete.

IJ" The slavery agitation must be suppress ed," says the organ, while the editor charges daily the Democratic party with doing more injury to the South than the Abolitionists. In this way he expects to stop the agitation of the lavery question. He denounced the repeal of the Missouri Compromise, anxious that slavery he can out of the slavery question; and in the same breath affects to deplore the agitation of it. His design is plain enough; he wants to othing said about it.

Mr to them, that a few political demagogues may Jones is a gentleman of fortune, a product of get office and spoils? The South will consent to the chivalrous State of South Carolina. He is erhaps the best dressed man in Kentucky. His eravat, is sound, past all cavil. His kid gloves fit with an accuracy that would have killed Beau Brammel with envy. He wears a graceful rattive to susceptible damsels within the radius of his "chawms." In short, he is the rose-pink of ropriety, and the lavender essence of elegance He reigns supreme in drawing rooms; is the of incipient ladies' men and the admiration

Col. Thomas L. Jones, like many a man before him, is not satisfied with the various acambition which is gooding him on to extinc His bosom palaitates for political honor From his carliest youth he has been afflicted with a controlling idea, that he was born for a great, as well as for a preity man. He was afflicted with this complaint during his connection with the Democratic party. Whenever an office up popped Col. Thomas L. Jones with his prof red services to his country in one hand, and a air brush in the other, ready to become re eiver general of the suffrages of the dear peole. Of course, he was always elected—to stay t home. The only important service which

He east it from him as an ungrate ful thing; a viper which he had warmed into life and which refused to send him to Congress cratic party from him in this heartless manuer urned towards "Sam," and with one of his nost bewitching smiles, graciously signified his tention of taking that promising young man uder his protection. But it is due to truth to say, that the that office; he has every prospect of escaping matter in the Ledger is admirably adapted for

His head has never yet produced a remarkable idea, saving and excepting that "miwaculous woach." We frankly admit of judgment and tact. We have no hesitation, that the "woach" presents a wide field for Mac-cassar oit and earling tongs, but we confess our inability to perceive the force of it in a candi-date for Treasurer. According to our homely

ideas, the qualities requisite to fit a man for that important office should be inside of the ead, and not upon the surface. Hence it is our unbought opinion that in the race for the office of Treasurer, Col. Jones will run far behind Col. Garrard. As much as we admire Col. Jones as a gentleman, we must say of Colonel Prince, a prominent member of Par that we do not think him fit for Treasurer. It Garrard running for the office of dancing-master for the State, we would bet our money on Col. est, intelligent, upright farmer, but to tell the truth, we dont suppose he can dance at all. He

The Butchers' National Convention

Judging from letters recently received by ominent butchers of Baltimore, the convention which is to assemble here on the 3d of September will be very generally attended. The butchers of Philadelphia have proposed

It is further recommended that the cities have

Certainly there is urgent necessity to action on the part of the butchers of the urin eipal cities and towns, as the price of beef i now far greater than it has been for many years

A number of the most respectable of th unite with the Black Republicans, and wants craft in this city declare that it is utterly in possible for them to continue business and sel at the present rates, in consequence of the hig rices they are compelled to pay for stock. They state that it is entirely owing to speculaors, some of whom, in New York and other ities, have already failed, solely on account o the false principle upon which they have been operating. No matter what may be the caus i the high price of beef, the public will doubt less be gratified to hear that the butchers, feelng themselves much aggrieved, will soon adopt casures calculated to reduce the commodity

In the mean time, the eraft of Baltimore ar making arrangements, in order to give their visiting brethren a most cordial reception.

What the Life of Ben. Franklin Teaches. What a lesson of industry and perseverance does the life of Franklin convey to the mind. What few advantages he had; how many diffieulties he had to contend with; how many hardships lie had to undergo, and yet, notwithstanding all this, what a great and good man he became! The question is, how came he ever to 1st. To consider the propriety of abolishing the scales as a medium of purchase.

2d. To recommend the establishment in each when he had so few advantages? He had natucity of a Board of Purchase, to act in concert in purchasing all cattle and sheep for the respective markets from the original grower and gained his education. He never, like the young men of the present day, drowned the sense that God bestowed upon him in glasses of gin and in making a discovery in its manufacture by which is brandy, or puffed away his ideas in tobaceo and they adopt a uniform constitution for their smoke; but every moment of his time was ocguidance, with the right of admission to any cupied. When he was not engaged in printing -for that was his earliest lesson in trade-he Schiedam Aromatir Schuapps." Schiedam Is the name was employed in reading. He spent all the

He began life upon a mere iota, but was elevated from a silton. poor boy to a statesman.

Franklin made some of the most wonderful

discoveries that have ever been made in this country. Among the most wonderful was that of the identity of electricity and lightning. His mind seems to have been capable of everything great and wonderful. He also found great many useful books, and he was one of the igners of the Declaration of Independence.

What a tesson of industry, perseverance goodness, self-government, and greatness, his le shows us. It teaches us afmost anything can be accomplished by nurturing that flower, perse verance. Stomach or Liver,
Sneh as Indigestion, Acidity of the Stomach, Colleky
Pains, Hearthurn, Loss of Appetite, Despondency,
Costiveness, Blind and Bleeding Pilos. In all Nervons, Rheimatic, and Neuralzic Affections, it has innumerous instances proved highly beneficial, and in
others effected a decided cure.

This is a purely vegetable compound, prapared on
strictly scientific principles, after the manner of the
celebrated Holland Professor, Boerhave. Because of
its great success in most of the European States, its
introduction into the United States was intended more
especially for those of our fatherland scattered here and
there over the face of this mighty country. Meeting
with great success among them, I now offer it to the
American public, knowing that its truly wonderful
medicinal virtues must be acknowledged.

It is particularly recommended to those persons
whose constitutions may have been impaired by the
continuous use of arient spirits, or other forms of dissipation. Generally instantaneous in effect, it funds its
way directly to the sent of life, thrilling and quickening every nerve, raising up the drooping spirit, and, in
Sect, infusing new health and vigor in the system.

NOTICE.—Whoever expects to find this a everage
will be disappointed; but to the sick, weak, and lowspirited, it will prove a grateful aromatic cordial, possessed of singular remedial properties. Stomach or Liver,

CAUTION! CAUTION:

The great popularity of this delightful Aroma has induced many infutions, which the public should guard guard part purchasing. Be not persuaded to hay anything less until you have given Boerhave's (tolland Bitters a fir trial. One bottle will convince you how infinitely insperior it is to all these imitations.

He will give references to people in the United States
who have found the greatest benefit and comfort in the
use of his newly-invented and improved Spectacles.

NEW DISCOVERY FOR DEAFNESS!

I hereby certify that the Eye Glasses shown me by G. Solomons are superior in finish and less obstructing to my perfect vision than any I have ever examined, and cheerfully recommend them to all in need of Glasses, R. H. JOHNSON, M. D., Eye Infirmary, Southwest corner Fourth and Sycamore streets, Cinciunati, Fobruary 15, 1856.

Mr. Solomons has furnished me with my first pair of Glasses. They appear to answer the purpose very well, and occasion no uneasiness to the eyes when used. The testimony of other medical gentlemen, of experience in the matter, is very conclusive in favor of these articles.
